

Market Update (c/o Victoria Real Estate Board)

October 2017

Victoria Real Estate Market Statistics

A total of 640 properties sold in the Victoria Real Estate Board region this September, 18.1 per cent fewer than the 781 properties sold in September last year.

"We can certainly feel the difference in the current market when we compare to last year's record breaking numbers. Last year the pace of the market was intense, there was a lot of pressure on pricing and demand," notes Victoria Real Estate Board President Ara Balabanian. "Now the tempo of the market is trending slowly – very slowly – towards more balanced conditions. Recently we've seen overall price increases level out, which can indicate slightly less demand, and inventory is building."

There were 1,976 active listings for sale on the Victoria Real Estate Board Multiple Listing Service[®] at the end of September 2017, an increase of 3.1 per cent compared to the month of August and 4.1 per cent fewer than the 2,061 active listings for sale at the end of September 2016.

The Multiple Listing Service[®] Home Price Index benchmark value for a single family home in the Victoria Core in September 2016 was \$742,200. The benchmark value for the same home in September 2017 has increased by 10.9 per cent to \$823,100.

"Simply because we've seen sales drop from last year is not dire or unexpected news for our local real estate market." adds President Balabanian. "The ten year average for sales in September is 573 properties and the month exceeded that average by more than ten per cent, which indicates we're still in an active market. And of course there are neighbourhoods that are still tracking up in terms of value from last year. It's for reasons like these that now more than ever it makes sense to seek the assistance of a local REALTOR® to sell or buy your home."

Total new MLS® listings and total MLS® sales for entire district

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

The active listing count and the sales count can be viewed as indicators of housing supply and demand respectively. Observing the ratio between them can thus help indicate a "buyers' market", where there is downward pressure on prices, and a "sellers' market", where there is upward pressure on prices.

- below 10%, there is downward pressure on prices (buyers' market)
- above 25%, there is upward pressure on prices (sellers' market)
- in the 15-20% range, there is little pressure on prices either way (balanced market)

MLS® HPI benchmark and value - Single Family Homes

The Victoria Real Estate Board uses the MLS® Home Price Index (MLS® HPI) to report on market trends. The MLS® HPI uses the concept of a benchmark home, a notional home with common attributes of typical homes in a defined area.

Through the analysis of over ten years of Victoria Real Estate Board MLS® sales data, the MLS® HPI defined benchmark homes for Victoria in each category (single family homes, townhouses, condos) and for each neighbourhood. The benchmark starting point was 2005, where each type of property and neighbourhood was assigned an index value of 100.

Sales to Active Listings Ratio

Sunday, October 01, 2017

The Sales to Active Listings Ratio

This chart tracks the ratio of total residential sales over total active residential listings at month-end for each of the last 25 months.

The active listing count and the sales count can be viewed as indicators of housing supply and demand respectively. Observing the ratio between them can thus help indicate a "buyers' market", where there is sustained downward pressure on prices, and a "sellers' market", where there is sustained upward pressure on prices.

Based on a regression analysis performed by the Economics Department of the BC Real Estate Association in each market area of the province, the Sales to Active Listings Ratio for Victoria can be interpreted as follows:

- below 14%, there is downward pressure on prices (buyers' market)
- above 20%, there is upward pressure on prices (sellers' market)
- in the 14-20% range, there is little pressure on prices either way (balanced market)
